To Whom It May Concern:

This is my story

On May 13, 2006 I was a pedestrian in a department store parking lot when a car struck me. As a result of this incident I had excruciating pain in my arms, legs and hips. This pain had never left me; I went to physiotherapy, massage therapy, and chiropractor with limited results.

I was worried this pain would be with me for the rest of my life.

In early August 2009 I started using the Trioxinator when I had a severe pain attack. The next day, to my amazement after my initial Trioxinator session my pain had reduced by 90%.

I have used the Trioxinator a total of three times for 15 minutes each time since August 2009 for the onset of pain and am happy to report that it has helped me with my pain every single time. Nothing had ever done this for my pain.

Also, whenever I have used the Trioxinator to help me with my stress, my sleep that night has been very deep and sound, this has resulted in an energy improvement and I always felt rested for the following day.

Finally, my hair has is softer and my hair loss has significantly diminished even though I have always had a full head of hair.

I would strongly recommend the Trioxinator to anybody who has had similar problems as I had.

Sincerely,

Merlyn Pollock
